

Minh Tran

Software Engineer Intern

I'm a self-taught software engineer with a strong passion for building efficient and user-centered applications. Over the past 8 years, I have worked in the advertising industry, creating numerous websites and applications. Through hands-on projects, online coursework (foundation in JavaScript, Python, NodeJS), and consistent problem-solving (via platforms like LeetCode, GitHub, etc.) Now, I want to dive deeper into development and improve my skills independently. I am seeking an opportunity to learn more and collaborate with a development team where I can continue to grow and contribute meaningful impact.

WORK EXPERIENCE

Software Developer

Aug 2024 - Present

PECA - My SaaS product

- A comprehensive app for pet wellness management and services.
