

Minh Tran

Software Engineer Intern

I'm a self-taught software engineer with a strong passion for building efficient and user-centered applications. Over the past 8 years, I have worked in the advertising industry, creating numerous websites and applications. Through hands-on projects, online coursework (foundation in JavaScript, Python, NodeJS), and consistent problem-solving (via platforms like LeetCode, GitHub, etc.) Now, I want to dive deeper into development and improve my skills independently. I am seeking an opportunity to learn more and collaborate with a development team where I can continue to grow and contribute meaningful impact.

WORK EXPERIENCE

Software Developer

Nov 2024 - Present

PECA - My SaaS product

- Assisted in developing a CRM software upgrade that saved an annual budget of \$80K, improving customer service by 73%
- Streamlined 17 existing applications for a more intuitive workflow; reduced interface complexity by 92%
- Collaborated with a 5-member team to release a new system suite; saving the company \$21K in monthly QA costs
- Partnered with 11 supervisors to develop tools that reduced debugging time 72%, saving engineers from repetitive tasks.

Full stack Developer

Nov 2024 - Present

My OS portfolio

- Assisted in developing a CRM software upgrade that saved an annual budget of \$80K, improving customer service by 73%
- Streamlined 17 existing applications for a more intuitive workflow; reduced interface complexity by 92%
